---

Front-end developer with 2 years of experience developing applications in the banking and e-commerce sector, oriented to good practices and defect monitoring; Currently, I am interested in entering the QA area, so I am developing skills as a Tester, one of my short-term goals is to become an automated Tester. I consider myself passionate about self-learning, observant, analytical, flexible, and oriented to teamwork.

## EXPERIENCE

### **Interfondos, Peru** - Web Application Development and UI / UX (*January 2020 - Present*)

- Developed new operations for the Erni website, allowing users to carry out transfers, opening, subscription, and redemptions online, achieved a 70% increase in new users, exceeding the annual goal of 2020.
- Developed and implemented the Erni Business applications, which allowed entering a new user profile oriented to companies, which increased the percentage of users to 10%.
- Implemented SEO tools, applying good practices and tools such as Hotjar, Google Tag Manager, and Analytics, allowing to know the possible indecencies of the users by 20%.
- Executed functional tests in the UAT phase, preventing failures by 70%, making reports to correct them, as well as reports for the back-end.
- Validated the design for web and mobile applications, ensuring usability and correct operation principles adapted to the tools used in the project.

*Tech-Stack:* TypeScript, Angular 6, jQuery, Bootstrap, NodeJS, SQL Server, .NET, C#, HTML, Sass, CSS, manual Tests.

### **Klick It, Peru** - Front-end Developer (*July 2019 - December 2019*)

- Developed the responsive design adapted to the client, working under Agile Methodologies (Scrum and Kanban), achieving the fulfillment of virtual stores' delivery and development objectives developed in Magento e-commerce.
- Executed functional tests based on the end-user in the UAT phase, preventing failures by 40%, making reports and documentation to my team.
- Generated the documentation by template type in GitLab, leaving a history of use for future development, supporting my team.

*Tech-Stack:* JavaScript, Magento, jQuery, Bootstrap, SQL, PHP, HTML, Less, CSS, manual Tests.
